CAREER OBJECTIVE

As a passionate and quick learner with experience in web development using the MERN stack, I am eager to contribute to innovative projects and expand my skill set. I thrive in collaborative team environments and excel at managing individual projects efficiently. My goal is to leverage my technical expertise and dedication to drive impactful solutions in a dynamic and growth-oriented organization.

WORK EXPERIENCE (INTERNSHIP)

OASIS INFOBYTE FEB24-MAR24

- Interned as a Web Developer, creating responsive portfolio and functioning pages, using HTML, CSS, and JavaScript.
- Proficient with various web development tools to optimize workflow and boost productivity.

GLOBAL TECH DEC23-JAN24

- Interned as a Web Developer, creating engaging landing pages using HTML and CSS.
- Collaborated with a team to implement responsive design practices using Tailwind CSS, ensuring cross-device compatibility

PROJECTS

- **SOULFUL BITES-A website for Cloud Kitchen**

I developed a front-end web application using React.js and Tailwind CSS to provide basic ordering services and support for a small-scale cloud kitchen.

- **TOURNAMENT AGGREGATOR- A basic MERN stack project**

I developed a basic full-stack web application using MongoDB, Express.js, and Node.js for backend services and database management. For the frontend, I used React.js and Vanilla CSS to create a simple interface with functionalities like adding and viewing tournaments.

- **BLOGITT - A travel blog**

I developed a full-stack web application using MongoDB, Express.js, and Node.js for backend services and database management. For the frontend, I used React.js and Tailwind CSS to create an engaging user interface that allows users to view, share, like, and comment on posts. The application also includes user authentication implemented with JavaScript.
